The Smart Way to Build

A completed project of Buddi Ganga Hydropower camp

Our Story

We started in 2024 with a simple goal: help Nepal build better. A year later, our plant in Bharatpur, Chitwan came online, backed by an NPR 20 crore investment. Today it turns out 150,000 sq. ft. of Smart Panel a year — lightweight, insulated, and ready for sites across the country.

What Is Smart Sandwitch Panel ?

Our flagship panel wraps a light EPS-and-cement core in 4.5mm calcium silicate board on both faces. A tongue-and-groove edge means every panel locks into the next — fast to install, clean to finish.

Sizes of Smart Sandwich Panel

Thickness	Length Options (mm)	Width (mm)
50mm	2400 / 2700 / 3000	610
75mm	2400 / 2700 / 3000	610
100mm	2400 / 2700 / 3000	610
120mm	2400	610
