

**COMPANY
PROFILE**

An ISO **9001:2015**
Certified company

**SMART
PANEL**

**The Smart
Way to
Build**

Legal Business Name: **Prefab Panel Nepal Pvt. Ltd.**

Brand Name: **Smart Panel**

Leadership: **Bimal Raj Gosai**, CEO

Factory Address: Darai Tole-8,
Bharatpur, **Chitwan**, Nepal

Corporate office: Pepsicola-32,
Kathmandu, Nepal

Email: **info@prefabpanelnepal.com**

Phone: **9851149804 / 9709084173**

Website: **www.prefabpanelnepal.com**

Facebook : facebook.com/**smartpanelnepal**

OUR STORY

We started in 2024 with a simple goal: help Nepal build better. A year later, our plant in Bharatpur, Chitwan came online, backed by an NPR 20 crore investment. Today it turns out 150,000 sq. ft. of Smart Panel a year — lightweight, insulated, and ready for sites across the country.

OUR MISSION

Smart, eco-friendly, earthquake-ready building material so every community can build faster, safer, and for less.

WHAT WE STAND FOR

Innovation & Quality

We keep refining how a panel comes together — always a step ahead.

Safety & Resilience

Seismic strength isn't an add-on. It's built into every panel.

Environmental Care

Less topsoil disturbed, fewer emissions released — by design.

WHAT IS SMART PANEL ?

Our flagship panel wraps a light EPS-and-cement core in 4.5mm calcium silicate board on both faces. A tongue-and-groove edge means every panel locks into the next — fast to install, clean to finish.

Smart Sandwich Panel

Lightweight interlocking prefabricated panels made from EPS beads, cement, sand, water, and bonding agents, with non-asbestos calcium silicate boards on both sides. They provide strength and insulation against seismic impact, fire, heat, sound, and moisture.

Smart Solid Panel

Lightweight interlocking prefabricated panels made from EPS beads, cement, sand, water, and bonding agents, reinforced with mesh for added strength. Both sides are plastered after installation.

Smart EPS Block

Lightweight construction blocks made from EPS beads, OPC cement, water, and essential additives. The materials are mixed and molded into different sizes and shapes.

Sizes of Smart Sandwich Panel and Smart Solid Panel

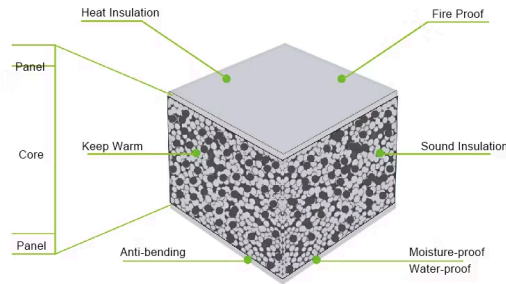

Thickness	Length Options (mm)	Width (mm)
50mm	2400 / 2700 / 3000	610
75mm	2400 / 2700 / 3000	610
100mm	2400 / 2700 / 3000	610
120mm	2400	610

Sizes of Smart EPS Block

100×200×600mm
150×200×600mm
200×200×600mm

Technical Data

Technical Detail		Sandwitch Panel (in mm)			
Dimension		50	75	100	120
Anti-Impact Performance (times)		≥8	≥10	≥15	≥15
Anti-Bending Damage (× dead weight)		≥3	≥3	≥3	≥3
Anti-Pressure Strength (MPa)		≥5	≥5	≥5	≥5
Softening Coefficient		≥0.80	≥0.80	≥0.80	≥0.80
Surface Density (kg/m³)		≤45	≤61	≤78	≤78
Moisture Rate (%)		≤10	≤9	≤7	≤7
Drying Shrinkage Value (mm)		≤0.45	≤0.5	≤0.6	≤0.6
Single Point Hanging Strength (N)		≥1200	≥1300	≥1500	≥1500
Sound Insulation Capacity (dB)		≥35	≥40	≥45	≥45
Fire Proof Time Limit (h)		≥3	≥4	≥4	≥4
Thermal Conductivity (W/mK)		≥0.30	≥0.30	≥0.30	≥0.30

Salient Features

 **Thermal Resistant/Insulation**

 **Sound Resistant**

 **Space Saving**

 **Water Resistant**

 **Quick Installation**

 **Cost saving**

 **Fire Resistant**

 **Earthquake Resistant**

On-Site Installation

No heavy machinery, no long learning curve. A Smart Panel crew gets to work with five familiar tools.

Cutting Machine — Trims panels cleanly to size on site.

Drill Machine — Sets fixings quickly and securely.

Welding Machine — Secures the steel frame and joints.

Thread Hand Drill — Fine adjustments and finishing work.

Plumb Bob — Keeps every panel true and vertical.

Why Builders Choose Smart Panel

Seismic Safety

A lighter wall means less force hits the structure when the ground shakes — lower base shear, less deflection.

Speed & Lower Cost

Tongue-and-groove panels click into place fast, cutting labor time and bringing handover forward.

Certified & Approved

Listed on the Government District Rate List — straightforward to specify on public and private projects alike.

Green Construction

No topsoil dug up, no kiln smoke released — built in part from recycled glass fiber.

Built for Every Builder

Commercial & High-Rise

Lighter walls trim structural steel and foundation costs by 5–6%.

Healthcare & Education

Quiet, fire-resistant spaces suited to learning and recovery.

Industrial & Agriculture

Fast build-out with steady indoor temperatures year-round.

Residential Builders

Earthquake-ready homes, cooler in summer and warmer in winter.

PROVEN WHERE IT COUNTS

Government District Rate List

50 mm — NPR 191 / sq. ft.

60 mm — NPR 293 / sq. ft.

75 mm — NPR 351 / sq. ft.

90 / 100 mm — NPR 410 / sq. ft.

120 mm — NPR 495 / sq. ft.

Installation — NPR 26 / sq. ft. • Accessories —
NPR 47 / sq. ft.

What a Client Says

"Prefab Panel Nepal made our construction project much easier — great quality, durable, and quick to install. We saved both money."

KTM Builders Pvt. Ltd.

Few of our on-going and completed projects.
